### SECTION 3 – HEALTH HAZARD DATA

---

#### « ACUTE EXPOSURE »

- ORAL TOXICITY:** Low order of acute oral toxicity. Aspiration into the lungs during ingestion or vomiting may cause mild to severe pulmonary injury and possibly death.
- EYE IRRITATION:** Product contacting the eyes may cause eye irritation. Based on data from components or similar material.
- SKIN IRRITATION:** Not expected to be a primary skin irritant. Based on data from components or similar materials. Prolonged or repeated skin contact as from clothing wet with material may cause dermatitis. Symptoms may include redness, edema, drying, defatting and cracking of the skin.
- DERMAL TOXICITY:** Product has a low order of acute dermal toxicity. Based on data from components or similar materials.
- INHALATION TOXICITY:** No data available to indicate product or components may be a toxic inhalation hazard.
- RESPIRATORY IRRITATION:** If material is misted or if vapors are generated from heating, exposure may cause irritation of mucous membranes and the upper respiratory tract similar to that observed with mineral oil. Based on data from components or similar materials. Under good industrial hygiene practices where all exposure limits are observed respiratory irritation should not be a problem.
- DERMAL SENSITIZATION:** No data available to indicate product or components may be a skin sensitizer.
- INHALATION SENSITIZATION:** No data available to indicate product or components may be a respiratory sensitizer.

#### « CHRONIC EXPOSURE »

- CHRONIC TOXICITY:** No data available to indicate product or components present at greater than 1% are chronic health hazards.
- CARCINOGENICITY:** No data available to indicate any components present at greater than 0.1% may present a carcinogenic hazard.
- MUTAGENICITY:** No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.
- REPRODUCTIVE TOXICITY:** No data available to indicate either product or components present a greater than 0.1% that may cause reproductive toxicity.
- TERATOGENICITY:** No data available to indicate either product or components contained at greater than 0.1% may cause birth defects.
